

# CineGrid

Global Experimental Facility for very high  
quality digital Cinema

## CineGrid R&D in Holland

**Cees de Laat**

CineGrid.org founding member

**University of Amsterdam**

# CineGrid Mission

To build an interdisciplinary **community** that is focused on the **research, development, and demonstration** of **networked** collaborative tools to enable the production, **use** and **exchange** of very-high-quality digital media over **photonic networks**.

<http://www.cinegrid.org/>

# Cinema combines art and science, culture and commerce, increasingly digital

- ❑ In California alone, movie industry employed 245,000 with \$17 billion payroll in 2005.
- ❑ Movie-making is going global. Local talent is key!
- ❑ Regional and international networks become “infrastructure incentives” for media companies to attract cinema jobs and deliver results worldwide.

# What is 4K ?

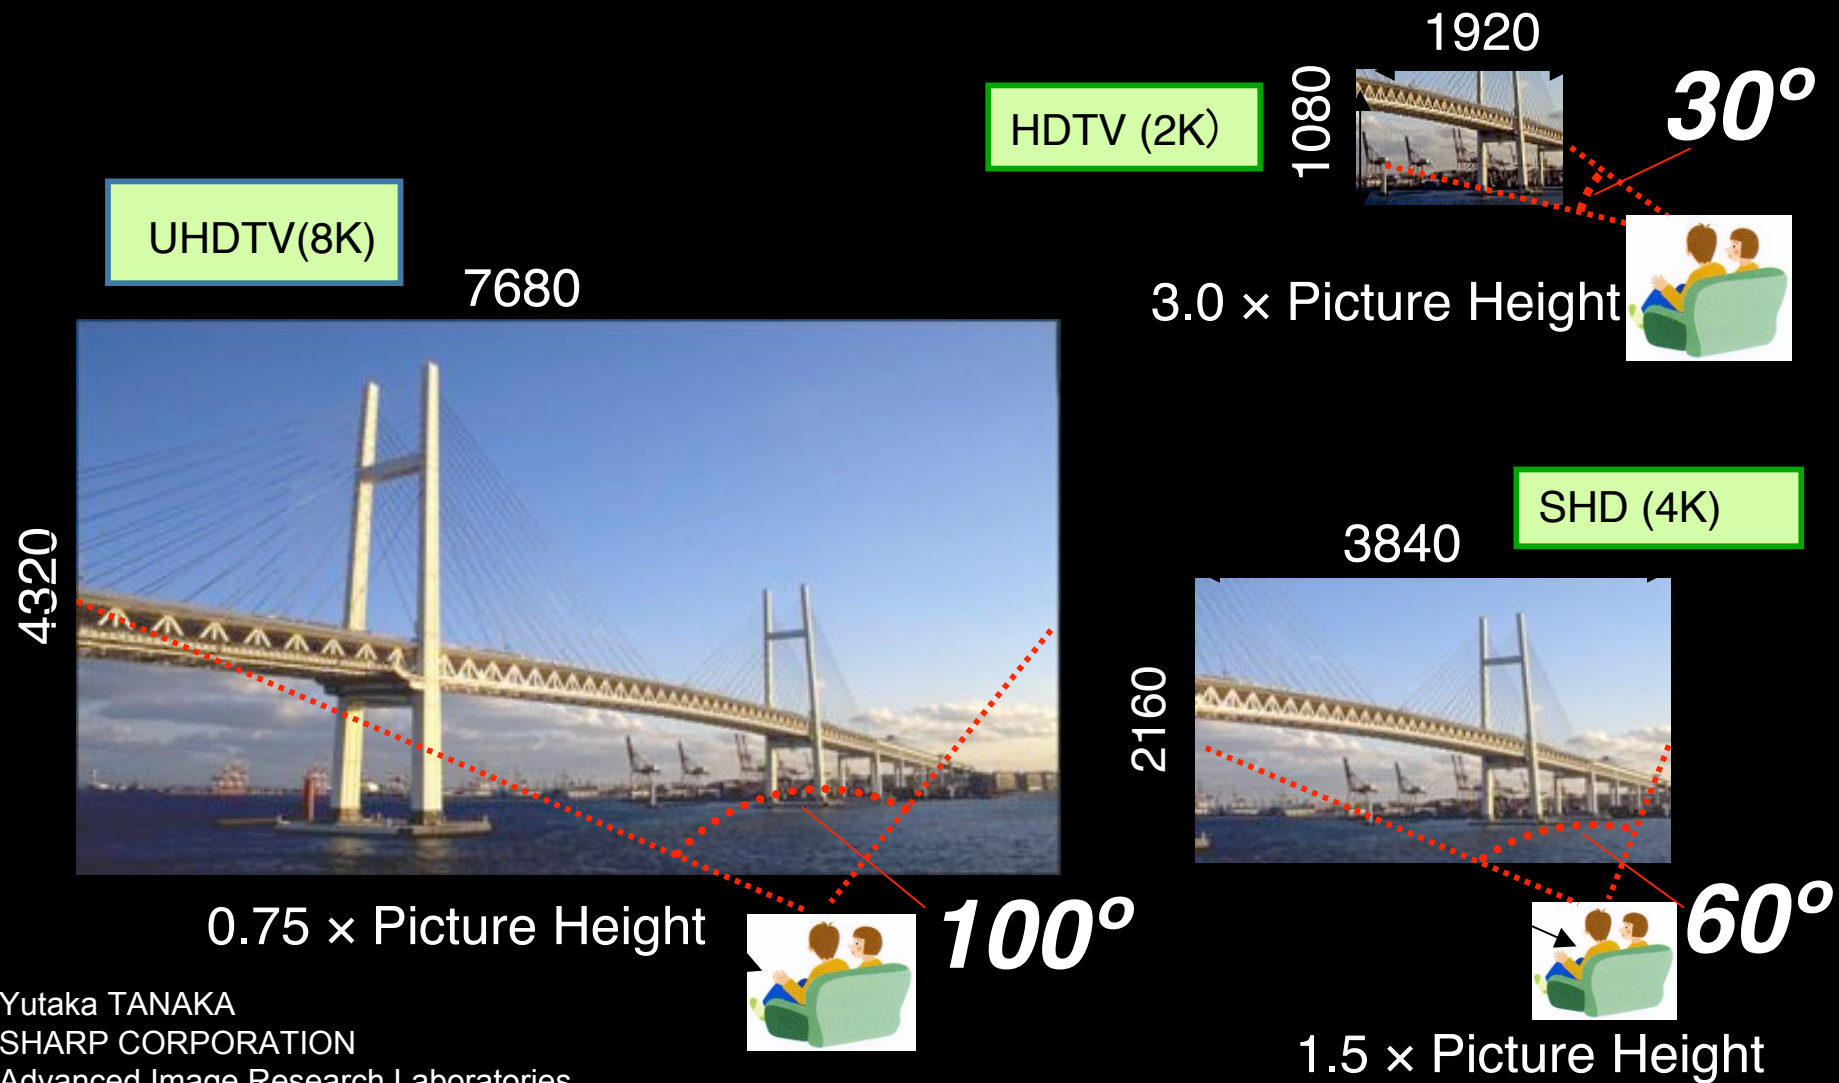

---

- ❑ Most broadly, “4K” describes any new format for motion pictures with 8+ Megapixels per frame
- ❑ Some “4K” is really Quad HDTV (*also known as SHD*)  
3840 x 2160; 24/25/30fps; 4:2:2/4:4:4; 10-bit Rec 709;  
Progressive Scan; Square Pixels; multiple codecs
- ❑ Strictly speaking, “4K” is one of two new SMPTE DC-28 standard formats for Digital Cinema Theatrical Distribution as recommended by Digital Cinema Initiatives (DCI)  
4096 x 2160; 24 fps; 4:4:4; 12-bit SMPTE XYZ, Progressive Scan; Square Pixels; JPEG 2000 codec only

# Why is more resolution is better?

1. More Resolution Allows Closer Viewing of Larger Image
2. Closer Viewing of Larger Image Increases Viewing Angle
3. Increased Viewing Angle Produces Stronger Emotional Response

# Formats - Numbers - Bits

# Format - Numbers - Bits (examples!)

Format	X	Y	Rate	Color bits/pix	Frame #pix	Frame MByte	Flow MByte/s	Stream Gbit/s
720p HD	1280	720	60	24	921600	2.8	170	1.3
1080p HD	1920	1080	30	24	2073600	6.2	190	1.5
2k	2048	1080	24 48	36	2211840	10	240 480	1.2 2.4
SHD	3840	2160	30	24	8294400	25	750	6.0
4k	4096	2160	24	36	8847360	40	960	7.6

Note: this is excluding sound!

Note: these are raw uncompressed data rates!

# Number, numbers and more numbers!

- **Digital Motion Picture for Audio Post-Production**
  - 1 TV Episode Dubbing Reference 1 GB
  - 1 Theatrical 5.1 Final Mix 8 GB
  - 1 Theatrical Feature Dubbing reference 30 GB
- **Digital Motion Picture Acquisition**
  - 6:1 up to 20:1 shooting ratios
  - 4k @ 24 FPS @ 10bit/color: ~48MB/Frame uncompressed
  - ~8TB for Finished 2 Hr Feature
- **Digital Dailies**
  - HD compressed MPEG-2 @ 25Mb/s
  - Data Size: ~22GB for 2 Hours
- **Digital Post-production and Visual Effects**
  - Terabytes, Gigabytes, Megabytes To Select Sites Depending on Project
- **Digital Motion Picture Distribution**
  - Film Printing in Regions
    - Features ~8TB
    - Trailers ~200GB
  - Digital Cinema to Theatres
    - Features ~200 - 300GB DCP
    - Trailers ~2 - 4GB DCP
- **Online Download**
  - Features ~1.3GB
  - TV Shows ~600MB

# Requirements

- Different applications, different traffic modes:
  - Conferencing - full duplex
    - typically low latency compressed, low jitter
  - from camera/production to (deep) store/forward
    - rough compression, needs transcoding, near real time
  - from store to theater or tiled display
    - compressed or uncompressed
  - from movie production to editing facility
    - no compression!
  - shared working environments
    - low jitter, no compression

# Role of UvA

- Founding member CineGrid
- Linking communities (CALIT(2), EVL, NTT, Keio University) to local organizations (SURFnet, SARA, de Waag, you!)
- System and Network Engineering
  - optical photonic networks
  - store & forward (100 terabyte experimental server)
  - AAA & security
  - grid for processing
- Metadata and make it searchable (MM)

# R & D

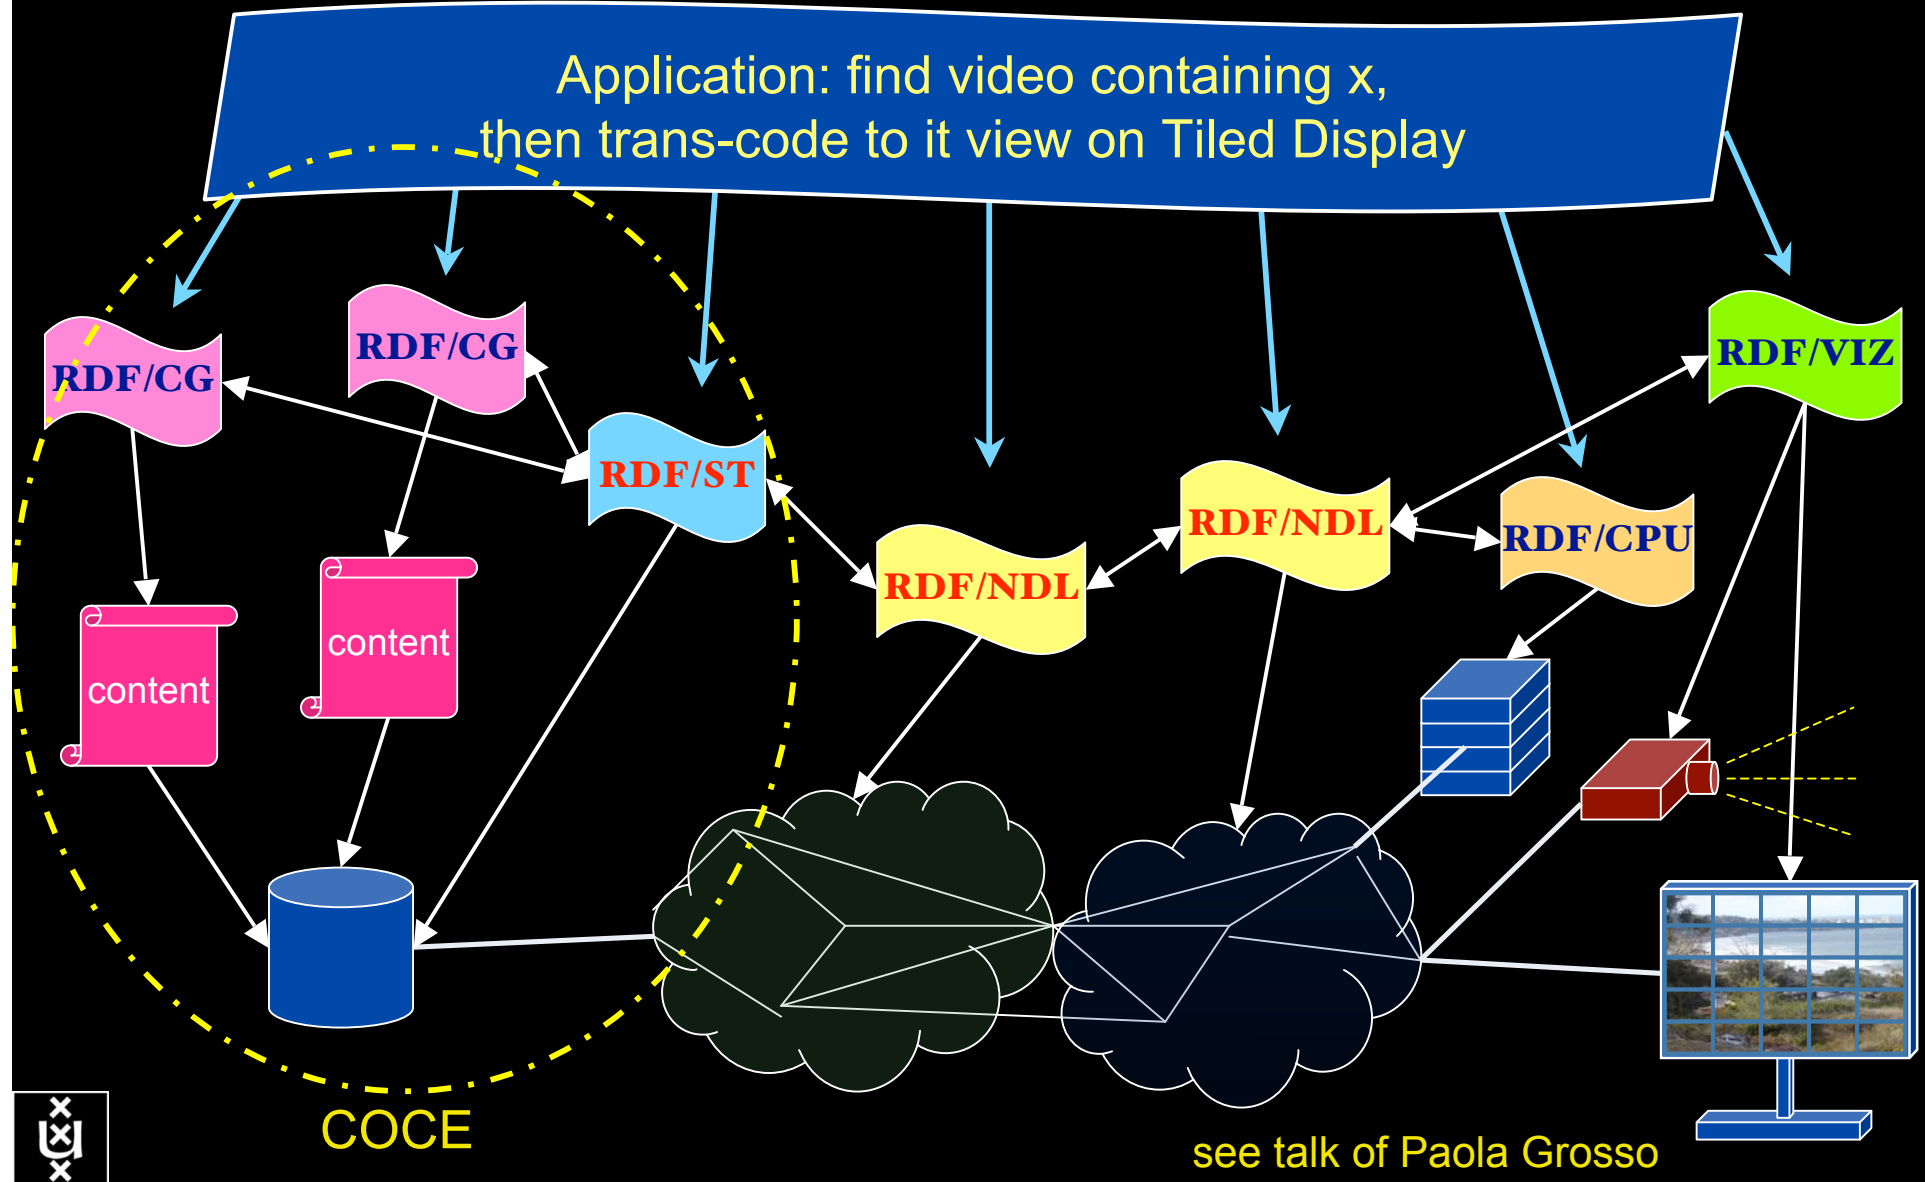

- interface portal to storage (supertube.org)
- interface portal to PBT enabled testbed and Netherlight / SURFnet\_6.0
- near real time transcoding on DAS-3
- scalable streaming via bridgenodes
- embedding in semantic web
- Access control / security
- content management / deep storage / repositories
- Disk -> network performance

# RDF describing Infrastructure

Application: find video containing x,  
then trans-code to it view on Tiled Display
